

Sarvesh Yadav

Software Development Engineer | Full-Stack | Java & Node.js | Next.js | AI Integration | Real-Time Systems
Bangalore | sarveshyadav5971@gmail.com | linkedin.com/in/sarvesh-yadav-84bb53150 | github.com/sarveshyadav21 | 7232092001

PROFESSIONAL SUMMARY

Full-Stack SDE with **2+ years of experience** in Java (Spring Boot), Node.js, and Next.js/React. Delivered end-to-end features across multi-tenant SaaS platforms, real-time WebSocket systems, and AI-integrated microservices. Experienced in Agile/Scrum, CI/CD, JIRA, and cross-functional collaboration with US-based clients. Reduced page load time by **12x (6s → 500ms)** and DB load by **~40%** via Redis caching.

SKILLS

Frontend: Next.js, React.js, Redux, TypeScript, JavaScript (ES6+), HTML5, CSS3, Socket.io Client

Backend (Java): Java, Spring Boot, Spring Security, Spring Data JPA, REST APIs, Microservices

Backend (Node.js): Node.js, Express.js, REST APIs, WebSocket (Socket.io), Redis, JWT

Cloud & DevOps: AWS, AWS Lambda, API Gateway, EC2, S3, CloudWatch, CI/CD

Database: PostgreSQL, MySQL, MongoDB, Redis (Caching & Pub/Sub)

AI Integration: OpenAI API, Claude API, Gemini API, Chatbot Development, Data Automation

Real-Time: WebSocket, Socket.io, Redis Pub/Sub, Event-Driven Architecture

Auth & Security: JWT, OAuth, RBAC, Secure Cookies, Session Management, Tenant Isolation

Process: Agile, Scrum, CI/CD, JIRA, Sprint Planning, Unit Testing, End-to-End Testing

Tools: Git, GitHub, Postman, IntelliJ IDEA, VS Code, Cursor, Prompt Engineering

PROFESSIONAL EXPERIENCE

SDE1 – Full Stack | Sheshi AI 03/2025 – Present

Bengaluru, India

- Built and scaled backend microservices in **Java (Spring Boot)** and **Node.js (Express.js)** across **5+ services** — authentication, session management, and multi-tenant business logic.
- Designed **multi-tenant RBAC** system using **Spring Security** (Java) and **JWT + Secure Cookies** (Node.js), supporting **500+ concurrent organizations**.
- Integrated **Redis** for session caching and Pub/Sub messaging — reduced DB hits by **~40%** and improved API latency.
- Built real-time features using **WebSocket (Socket.io)** on Node.js backend; integrated WebSocket streams into **Next.js** frontend for **live UI rendering**.
- Developed AI microservices using **OpenAI, Claude, and Gemini APIs** in Java and Node.js — powering an in-app chatbot and LLM-driven data automation pipelines.
- Implemented **SSR/SSG**, lazy loading, and code splitting in Next.js — reduced page load from ~6s to under **500ms (12x improvement)**.
- Resolved **3+ critical auth vulnerabilities**; improved UX issue rate by **~60%**.
- Tracked all sprint tasks on **JIRA**; wrote and executed **end-to-end test cases** covering happy paths, edge cases, and failure scenarios before every deployment.

Full-Stack Developer | Masai 08/2024 – 03/2025

Bengaluru, India

- Full Stack training program to up-skill.
- Built scalable **RESTful APIs** using **Node.js** and **Express.js** across 6+ production-grade projects.
- Designed **microservice architectures** with stateless services and **horizontal scaling** to handle high concurrent user loads.
- Implemented **JWT authentication, PostgreSQL/MongoDB** schemas, and query optimization for performance under load.
- Developed responsive **Next.js / React.js** frontends with **Redux** state management, SSR/SSG, and code splitting — improved Lighthouse scores by **30%+**.
- Practiced **Agile** sprint cycles, peer code reviews, **unit testing**, and **end-to-end test execution** across all projects.

Associate | The Judge Group (US-Based Client) 07/2022 – 08/2023

Noida, India

- Built backend services in **Java (Spring Boot)** with **Spring Data JPA**, **Spring Security** (RBAC), and microservice communication — system serving **1,000+ concurrent users**.
- Contributed **Node.js (Express.js)** integration layers between microservices; worked with **MySQL** and **PostgreSQL** across **3+ release cycles**.
- Developed **React.js** frontend components with **Redux**, consuming Java and Node.js REST APIs.
- Served as **primary client-facing developer** — led requirement calls across time zones, translated business needs into technical specs for a cross-functional **team of 8+**.
- Managed feature backlog, sprint tasks, and bug tracking on **JIRA** across **10+ sprint cycles** with **100% task visibility**.
- Authored test cases and executed **end-to-end testing** before each release — achieved **zero critical post-release defects**.

PROJECTS

AI Incident Intelligence Platform

Next.js, NestJS, PostgreSQL, Prisma, Redis, BullMQ, Gemini AI, Docker

Live: [LINK](#)

- Built an AI-powered incident management platform that automates incident triage, severity classification, impact analysis, and remediation recommendations.
- Designed a full-stack architecture using Next.js frontend and NestJS backend with PostgreSQL and Prisma ORM.
- Implemented asynchronous AI processing pipelines using BullMQ and Redis queues to handle incident analysis workloads.
- Integrated Gemini AI to generate incident summaries, root cause hypotheses, affected service analysis, and actionable remediation steps.
- Developed multi-stage incident workflows including incident creation, analysis, enrichment, status tracking, and resolution management.
- Built scalable REST APIs with role-based access control, authentication, and workspace-level isolation.
- Optimized background job processing and database access patterns for high-volume incident ingestion.

AI Portfolio Website with Intelligent Chatbot

Next.js, TypeScript, Gemini AI, Tailwind CSS, Vercel

Live: [LINK](#)

- Designed and developed a personal portfolio website featuring an AI-powered conversational assistant capable of answering questions about professional experience, skills, projects, and career achievements.
- Built a custom chat API using Next.js API Routes and Gemini AI integration for contextual question-answering.
- Implemented markdown rendering, conversation history management, and responsive chat interfaces.
- Engineered prompt-driven retrieval logic to provide accurate project and experience-based responses.
- Deployed the application on Vercel with serverless backend functions and environment-based AI configuration.
- Created a modern responsive UI with optimized performance, accessibility, and SEO best practices.

Real-Time Collaboration Platform

Node.js, Socket.io, Redis Pub/Sub, Next.js

- Built a real-time collaboration system using Socket.io and Redis Pub/Sub for instant data synchronization.
- Implemented event-driven architecture supporting low-latency communication across connected clients.
- Integrated real-time updates into Next.js frontend without polling mechanisms.
- Designed scalable WebSocket communication patterns for multi-user collaboration scenarios.

EDUCATION

BTech – Electronics and Communications Engineering 2018 – 2022

Poornima College of Engineering

CERTIFICATIONS

Full-Stack Development Certification (Java)

Samyak Computer Classes
