PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 1+ years of experience building scalable SaaS applications using Next.js, React, Node.js, and cloud technologies. Skilled in developing multi-tenant, real-time, and AI-powered platforms across frontend, backend, authentication, and infrastructure.

SKILLS

Frontend: Next.js, React.js, Redux, TypeScript, JavaScript (ES6+), HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, WebSocket (Socket.io), JWT

Cloud & DevOps: AWS, AWS Lambda, API Gateway, EC2, S3, CloudWatch, CI/CD

Database: PostgreSQL, MySQL, MongoDB, Redis

AI & LLM: Gemini, Ollama, RAG, LLM, Chatbot Development, Prompt Engineering, Vector Search

Real-Time Systems: WebSocket, Socket.io, Redis Pub/Sub, Event-Driven Architecture

Auth & Security: JWT, OAuth, RBAC, Secure Cookies, Session Management, Tenant Isolation

Process & Tools: Agile, JIRA, Unit Testing, Git, GitHub, Postman, VS Code, Cursor

PROFESSIONAL EXPERIENCE

SDE1 – Full Stack | **Sheshi AI** 03/2025 – Present

Bengaluru, India

- Built and scaled full-stack multi-tenant SaaS applications using Node.js, React, Next.js, PostgreSQL, and Redis, powering authentication, AI workflows, and session management.
- Designed a multi-tenant RBAC system with JWT, secure cookies, tenant isolation, subdomain routing, and custom domain mapping, supporting **1,000+ organizations** and white-labeled deployments.
- Implemented Redis caching, Pub/Sub messaging, Socket.io, and WebSockets, reducing database load by **~40%** while enabling low-latency real-time communication.
- Developed reusable React/Next.js component systems and optimized SSR/SSG, lazy loading, and code splitting, reducing page load times from **~6s to under 500ms**.
- Built event-driven workflows with AWS Lambda and used CloudWatch for centralized monitoring, logging, and production issue diagnosis.

PROJECTS

AI Incident Intelligence Platform

Next.js, NestJS, PostgreSQL, Prisma, Ollama, Redis, BullMQ, Vector Search, RAG, Docker

Live: <https://incident-intelligence-platform-psi.vercel.app/>

- Built an AI-powered incident management platform using Next.js, NestJS, PostgreSQL, and Prisma for scalable incident lifecycle management.
- Implemented asynchronous AI processing with BullMQ, Redis, Ollama-hosted LLMs, and a RAG pipeline using vector search and semantic retrieval.
- Automated incident triage, severity classification, impact analysis, remediation recommendations, and AI-driven incident enrichment workflows.

AI Portfolio Website with Intelligent Chatbot

Next.js, TypeScript, Gemini AI, Tailwind CSS, Vercel

Live: <https://sarvesh-yadav-portfolio.vercel.app/>

- Built a personal portfolio website with an AI assistant to answer questions about my experience, skills, and projects.
- Developed a custom chat API using **Next.js API Routes** and **Gemini AI** for contextual responses.
- Implemented prompt-based context management for accurate, portfolio-specific answers.

EDUCATION

BTech – Electronics and Communications Engineering 2018 – 2022 *Poornima College of Engineering*

CERTIFICATIONS/TRAINING

Full-Stack Developer | **Masai** 08/2024 – 03/2025

Bengaluru, India

- Built scalable REST APIs using Node.js and Express.js across multiple production-grade projects.
- Designed microservice-based applications with JWT authentication, PostgreSQL/MongoDB integration, and performance optimization.
